

October 29, 2015 - Hey guys, maybe I'm missing something but I can't figure out how to display the speed digitally. I have a 2016 Touring with no tech packages.## #Hello everyone. I have a 2017 Mazda CX-9 still under warranty. This winter, the edges of the infotainment system cracked due to the cold. I couldn't get it to work. This morning I opened the hood and plugged it into my laptop to check. Turns out I have access to a software update. I tried the updates and got an error message that obviously has a very simple explanation. I'm not sure what I'm doubting, but I feel like he's doing something wrong. I'm having trouble starting Mazda right now, and I suspect a software update is the root cause.
