Acquirejs is a library that allows you to easily and quickly build your own JavaScript maps. It is not the only library in the world that can do that, but it allows you to quickly create a "tile" like map, with custom colors and styles, and save it as an image map or other formats. We have put a lot of work into this library, since we all know that JavaScript is not the best language. Instructions on how to use the library and create your own tile-map in no time. Download free downloads from Asset Track The new browser "Pale Moon" has many outstanding features that make it a good alternative to the use of IE. However, it does not always recognize the CSS. I will give you some tips to help it Compress CSS Files Almost every web developer has to be able to compress the code CSS files, so that they use less space. You can do that by following these simple steps: Go to the folder where the files are located, go to the file png you want to compress and go to Control Panel Select Compress It's done! View Error in the Pale Moon If you are facing the problem of view errors in the Pale Moon, then the solution is not so simple and I leave it to the experts. I believe that the Pale Moon has been developed with the best possible features, however, sometimes it is necessary to look for a solution. The problem may be solved by updating Pale Moon. You can find it by activating it in the control panel. After activating, you need to go to the menu Pale Moon, then Tools, Update. However, it is necessary to be patient. Updates should be downloaded and installed during a relative moment. For more information, consult our web developers in order to have a solution. Change the browser options to remove the specific page The Pale Moon has different options to develop, and that makes it possible to hide what you consider to be unsightly on the browser. These options are in Pale Moon, and you can activate them through the following steps: Go to the menu Pale Moon, then Tools, Options After that, open the "General" tab From the "Browsing" section 09e8f5149f

What's New in the Fenix Manager?

Fenix Manager is an intuitive and advanced software program that you can use to easily tinker with connection settings in the Modbus network. It is wrapped in a pleasant and user-friendly interface, and it comes loaded with several useful options and configuration parameters. Rapid installation and attractive GUI The entire setup operation is over in just a few seconds, after which Fenix Manager greets you with a regular window that has a neatly organized structure. You can start a new project by specifying a name, author, company and description. HTML templates can be automatically generated to help you get ready. Configure settings for new projects A tree view is shown on the left part of the frame and it lets you seamlessly explore HTML files, icons, JavaScript files and internal tags. New connections can be added after settings the name, driver and parameters. When it comes to drivers, Fenix Manager offers support for ModbusMasterASCII, ModbusMasterRTU and ModbusMasterTCP. It is possible to add devices with addresses, internal tags with names, data types, initial values and descriptions, in addition to regular tags and files. Object properties can be examined, categorized and sorted from the right side of the window. Meanwhile, you can start tables, charts, logs and the editor, as well as insert new drivers or remove existing ones. The project can be saved to file and resumed at a later time. Evaluation and conclusion There were no kind of stability issues in our tests, since the tool did not hang, crash or pop up error messages. It has a good response time and runs on low CPU and RAM, so it does not hamper system performance. Wrapped in a user-friendly interface, Fenix Manager provides users with approachable options and configuration settings for managing Modbus network connections easily.
