very short range radio technology
intended to replace wired connections
between devices. It transmits data at

the rate of up to 2 Mb/s or 4150 bps, allowing effective distances of up to 100 m, and allowing two devices that are several metres apart to be able to communicate. Bluetooth started development at the Advanced Micro Devices (AMD) research lab and was first mentioned in public in 1997. The original working name was ARB (Audio-Radio-Video), but it was changed to Bluetooth after an objection that radio (broadcasting) was already a type of technology.
