January 21, 2021 - GhostTown is a town/city generator script created by Christian Larsen (Kilad). The plugin originally worked in 3DS Max, but until recently . Ghost Town has 3D models that you can use to create your own 3D game. The plugin can be used both to create your own 3D scenes and to render in 3DS Max. Ghost Town has several types of 3D city environments. In this article, we will use only a part of them: "Urban zone" and "Central access zone". These are two 3D city zones that have several buildings that can be used to test different mechanisms.
