by tester65 0 / 5 I received this game for review purposes. I have been playing the game for several hours now and I am still struggling to find something interesting to do. The battle system is a rather simple affair. When both players fight you have a front row and a back row. In the front row you have your stats and your spells. In the back row you have your skills, and abilities, which represent your special attacks. To see your entire front line of stats go to the skill tree and scroll down to the bottom where you will see your stats highlighted. You can add new skills to your skill tree by using a slot called a Platinum Key. The player uses one or more platinum keys to add new skills to their skill trees. Platinum Keys can be purchased with silver or gold. If you buy a gold key you can purchase platinum keys up to 100 times. This will also allow you to add more abilities to your skill tree. The player can also spend gold to boost a character's stats. You can also spend silver to increase your character's stats. Some skills use artifacts that are purchased with silver. You can purchase up to a maximum of five artifacts at once, and for silver. My problem with the game is that there is not a lot that happens. Also, I still have to level. I like the way the graphics look; It's nice and bright and clean. I like the art, but I also think the game needs a lot of work. There is not much variety in the area's they are set. It's like a big open square. There is only a few mobs in it. It's funny how the battles seem to not be balanced. Sometimes you fight an enemy who has more HP than you and sometimes you fight an enemy who has less HP than you. Also, you have to kill monsters up to level 30; It's a pain. I also don't like that you have to use scrolls. I think you should be able to use healing potions to avoid using scrolls. The combat seems to lack variety. It's just not that good. Some battles seem to be like a 'pick your attack, and then hit' type of deal. They really need a bit more of a 'action' type of feel. Some battles are very simple, and not that hard. This seems to be the case with almost every battle. When you finally reach level 30 there is not really much to do bff6bb2d33
