FIFA 22 includes new Pro & Demolishing Combinations, new Scouting System and new Ball Physics, all supported by a revised Player Intelligence engine. There are also more authentic goalkeepers, renewed Goal Pitches, improved Artificial Intelligence, new Features, as well as overall improvements and refinements to gameplay. Acquired Skills The player will be focused on attacking the ball from its initial state, through preparation, control, shot, and the receiver. There is a need to get the ball in the most favourable position, i.e. behind the defender's back, crossbar, or into the area of the goal. The players will need to develop outstanding skills, i.e. to play around defenders using lightning fast speed and dribbling skills, to use accurate shots, and to form a partnership with the striker. New Gameplay Features FIFA 22 is supported by a new Player Intelligence engine, which will help to make players more tactically intelligent, assisting in decision-making and preventing "jumping" at defenders. There are also revised tackle mechanics, ball animation and graphics. New Pro & Demolishing Combinations We have developed new Pro & Demolishing combinations. These combinations have been designed to help players unlock amazing skills and show off their dribbling, speed and control abilities. New Scouting System The scouting system is used to evaluate the upcoming decisions. The scouting indicator shows how the players can influence the outcome of the next action. The indicator is determined by the skill level and tactical decisions of each player. New Ball Physics The ball physics are refined, and the new player movements in combination with the new ball physics can provide a more realistic and complete experience. The ball physics can be used to shoot or pass the ball. The new behaviour of the goalkeeper is also designed to provide better opportunities to score. New Goal Pitches and Improved Artificial Intelligence We have improved pitch and player AI and addressed the existing problems. The goal pitches have been completely renewed to make the gameplay feel more realistic. Players will be able to land good and long shots, and improve their accuracy significantly with our new shots. The AI of the goalkeeper will also be updated, and the goalkeeper will play safer and smarter in key situations. Improved Graphics and New Sounds FIFA 22 is supported by the new graphics engine, which supports multi-threading and

If you're going to go into this kind of things, you're better off with idiomatic videos or books, not a messy collection of random video. Also this really does not push my computer to it's limits when ran at its native 4K resolution. ~~~ vlucas I'd prefer a video with a theme. Something like this covers a few of the interesting angles and types of trees: [ ~~~ pdimitar That is indeed a good suggestion! Thanks. I didn't think of that actually!
