A prince is framed for murder, left to rot in the Dark Prison to his death, all while a beast from the Brink of Hell is looking for revenge. One man, fifteen years later, is about to die... but the second prince will rise... Vagrus - The Riven Realms: Chapter 1: A young prince is murdered, and left to die in the dark, dank and foul-smelling prison to which he was consigned. In the darkness and coldness of that prison, for fifteen years, he has been waiting for his revenge... Valorant is a darkly beautiful PvP shooter. It blends the best aspects of Horizon: Zero Dawn with the fast pacing of Titanfall, all with an aesthetic that's unlike anything else you've played before. Players stand together in five distinct battle zones, each with a different theme, and fight each other to the death through neon-filled arenas. Combat within Valorant is fast, frenetic, and brilliantly balanced. It's intuitive, requires minimal button presses, and has a character and art design that makes it accessible to anyone. The art and audio are fantastic as well, with fantastic world-building and a beautiful dark and ominous soundtrack. Vagrus - The Riven Realms: Chapter 2: The first chapter of Vagrus, the Riven Realms introduces the first of seven distinct Arenas within the game, and follows the hero into his own story. We're about to begin a run of five news updates that will introduce and detail each zone, as well as the team that created them. We've divided them up into five chapters, because we felt like five divided by seven made a whole lot more sense for our objectives. Vagrus - The Riven Realms: Chapter 3: The second chapter of Vagrus, the Riven Realms focuses on one of our art teams. The first chapter of the Riven Realms introduced the hero and explored the setting, the second chapter will focus on the visual design of those environments. Our Art Director Max Blomkvist is going to detail each map for you. We're starting with the Archroads, which we designed for the first chapter of Vagrus, the Riven Realms. The Archroads are both an environment and theme within Valorant, and an abstract visual design concept. We're going to detail each element

Features Key:

- Open-world survival horror game. Easily go from a tank to a helicopter. Detailed environments require careful exploration, item finding, and crafting.
- Environmental puzzles rely on trial and error to survive. It's less of a puzzle game, and more of a super-hard trial.
- Hundreds of hours of gameplay in a beautiful world. Exploration is still the path to finding clues and artifacts from a lost world.
- A faithful translation in the vein of more traditional Japanese survival horror games. Collect items, craft items, buy better items, win battles, hunt, communicate, stay sane.
- Other adventure horror games have tried to masquerade a supernatural slant as horror. A Room Beyond goes deeper, and is a brutal puzzle of isolation, disease, and human survival. Beating this game requires many creative approaches to staying alive.
- An original soundtrack with over an hour's worth of authentic-sounding music.
- A small room, 6 square meters at most, that has been your home for five years. You have memories of life here. You have stuff that's still here. Take it, cannibalize it, or just fondly remember it.
- Extensive options. Allow players to play the game to their hearts content.
- Hostage system. With an eye towards being immersive, you can't move out of your room and you can't save the game.

I AM OUT THERE!! This is an eco-friendly test pattern for the game project this year. I made the game and even the user interface. The game play and the visual style were done by other people. But, I did the design of the controls. Also, I did the character animation too. If you enjoy the game, feel free to check out the other games that I create as well as the other artworks that I made here on DeviantArt! My tumblr can be found here: my facebook can be found here: How to turn on/off tabs when the list has been changed on tab menu I have a multi-tab page that I created. It has a search form and then a result listing. I want to make it so that when you click on the tab menu item, it changes the content on the tabs. This works fine when you have a complete search term, but when I change the search term (I have a search input box on the first tab) I want the tab to change the list (displaying the new result listing), but leave the other tab un-shifted. In other words, when I have a new search term, I want to only change the content on the tab menu that has the new search term. Here's my current code: HTML: Test Tabs Search Tab1 Tab2 c9d1549cdd

Born and raised in the video game industry, I've been walking in the industry for about 23 years. I love shooting things and blowing them up. If you think you're good, then challenge me. The theme for Chaos Legion is "Power and Glory". The world of Chaos Legion is based off of World War II, and the theme is based off of the era. For a lot of gamers, this might be their first time playing a faction from the Chaos side, and this is the first of hopefully many titles in the series. Everything else is secondary to this game. Maybe it's the world of Babylon or the land of Blades, maybe it's our system of control or the hope for true freedom. It doesn't matter, because as long as a video game is fun, I don't care what it is. That's how I fell in love with the internet. It's a place where people can openly share things that they love with one another. No government, no social constraints. No shame. The story for Chaos Legion will take place in an alternate, alternate future. Think about the United States, Japan, the United Kingdom, and Russia with millions of people in each nation. Combine this with easy access to the internet, and you will have a nation of opportunities for players to explore. Chaos Legion is set in the late 21st century, and I'm a firm believer that gun control works. If it didn't, then we wouldn't have the success of what is now The United States of America. Chaos Legion, like all other games, is being developed by a very small team. But make no mistake: this is a title for the hardcore. I have been developing games for 23 years, so I'm familiar with the challenges we face. It takes a lot of work to create a game that will live up to the high quality of our current titles. To put in all the features needed for a game of this caliber takes an experienced team that will work extra hard on each character in the game, and each mechanic and feature. I don't expect any less effort than we currently put in for the other games, and I'm sure you'll be able to see that in our game. And that's why I'm sure you will enjoy our game, because
