Kursbuch PDF 1.1 Praxis: B2 1 Jugendschutz :
-95ec0d2f82 - PDF . 70% Complete The current A-
Level German course begins to examine the basic
features of the language: structure, spelling,
lexicon, syntax, morphology, and pragmatics. The
written language is the foundation of the spoken
language, and is studied first. After grammar, the
B2-level focuses on vocabulary and the continued

growth of structures. The content of the courses has an emphasis on the practical application of the language. The linguistic units that are studied are taught in a separate way, with a particular emphasis on the proper usage of the language in a variety of settings, including written material and academic papers. Through the course work, students master a range of concepts that will help them to acquire the skills needed for advanced academic and professional pursuits. Since German culture is a part of the whole, there is a heavy emphasis in courses on literature, art, music, film, and technology. For example, the course work focuses on German literature by exploring the novels, short stories, and poems of Heinrich Mann, Thomas Mann, Bertolt Brecht, and others. Also, the topics of music, film, and technology are studied thoroughly, giving students the opportunity to experience the arts and technology that are part of German culture.
