What's New in the Torrent Ratio Keeper Monster?

Keeping the torrent ratio up on BitTorrent trackers is a task that you may not be comfortable with without help. That's why we designed the Torrent Ratio Keeper feature in uTorrent, a free uTorrent application for both Windows and Mac. We developed an easy-to-use interface that allows you to increase the torrent ratio of each tracker with just a few clicks. You can adjust the upload and download limits per tracker, as well as all the traffic values, making sure you don't get a maximum ratio error. Keep the torrent ratio up! - Free: the uTorrent app is free, you don't need to pay to download it or to use it. We also provide free support and updates through our customer support desk. - Premium: the uTorrent Premium product includes all features of the free version plus a lot of extra goodies, such as premium support and regular updates. Keep the torrent ratio up! In uTorrent - Reduce uploads to 0: in case you're using uTorrent, you might want to reduce the upload requests to a bare minimum. It will likely boost your upload rate and thus your download rate. - Increase uploads to a specific value: while reducing uploads to 0 might work in case you're using uTorrent, you might not be able to increase the upload limit to a higher value. In this case, you need to increase the upload requests. - Set the upload and download limits per tracker: in case you have a lot of trackers and thus a lot of data traffic, we recommend that you set the upload and download limits per tracker. This is also an easy way of keeping the ratio in check. Set the upload and download limits per tracker. In uTorrent - Increase the traffic limit for one or more trackers: on the other hand, in case you have a lot of trackers, the traffic limits might be too high for your account. So you'll need to reduce the traffic limit to one or more trackers. In case you only have one tracker, set the traffic limits for that tracker only. In case you have several trackers, set the traffic limits per tracker. - Increase the traffic limit for all the trackers at once: if you have a lot of trackers and your traffic limit is too low, you'll need to increase the traffic limit for all the trackers simultaneously. Of course, this can slow down the transfer speed for a longer period of time. Increase the traffic limit for
