Lacrymator. Hello, This method is used to identify the game version by checking the symbol on the upper part of the game (next to the checkbox). Please refer to the steps below to install the game. 1.1

Open the folder that you have downloaded the files to. 1.2 Copy and paste the GameData folder to the Program Files (x86) folder. 1.3 Start the game. 1.4 The game will exit and the message "UNKNOWN" will appear. P.S. The message UNKNOWN will appear if you have not pressed the checkbox next to the game in the main menu. For more information about this please refer to the Additional Notes. However, if you have

pressed the checkbox, the following folder will appear in the GameData folder:

To calculate the average score of a PlayStation game, multiply the score for each mission by the number of missions.

For example, if the mission score is 10, 10, 5, 5, 0, 5, 10, 10, then the game average score is 35

($10 \times 10 + 10 \times 5 + 5 \times 5 + 0 \times 5 + 5 \times 10 + 10 \times 10$).

The number of missions with positive scores, then, is the sum of the positive missions. The sum of the negative scores is the total score of the game. For more

information, please refer to the game review. To calculate the average score of a GameCube game, multiply the mission score by the number of missions. For

example, if the mission score is 10, 10, 10, 5, 5, 0, 10, 0, 5, then the game average score is 44.5 ($10 \times 10 + 10 \times 10 + 10 \times 5 + 5 \times 5 + 0 \times 5 + 10 \times 10 + 0 \times 5 + 5 \times 10$). PC:
