Limitations When opening a drawing that is hosted on an A360 cloud platform, the A360 desktop client is often used to start the drawing. A360 Desktop is a separate product that provides network access to CAD files hosted on the A360 cloud platform. A360 Desktop makes it easy to view and manage AutoCAD files online. The hypothesis that thiamine supplementation can improve milk production in dairy cows fed forage-based diets was tested. Thirty-six multiparous (2.8 parity) cows were assigned to 1 of 3 dietary treatments: (1) a high forage diet with 10.5% crude protein (CP) and 7.5% fat, (2) a high forage diet with 13.5% CP and 7.5% fat, or (3) a high concentrate diet with 11.2% CP and 8% fat. All diets were formulated to be isonitrogenous and isocaloric. Dietary treatments were supplemented with 1.5 kg of DM daily thiamine for 15 wk. Supplementation of the concentrate diet with thiamine did not increase milk production compared with the control diet. Dry matter intake was slightly reduced and milk production tended to be reduced by thiamine supplementation in the high forage diet. Supplementation of the high forage diet with thiamine resulted in increased plasma thiamine concentrations and higher activity of thiamine pyrophosphokinase in the liver
