## **Sardu MultiBoot USB Creator Linux Windows Serial Key Keygen**

sardu multiboot is one of the simplest and fastest way to format and burn multiple os into usb drive. you just need to pick the iso from your hard drive and launch the tool. sardu multiboot is easy to use and easy to learn. you can get rid of the hassle of purchasing physical media and also you can get a different operating system from a reliable place. sardu multiboot is very good, simple to use. just copy any bootable iso or imgptn file to respective folder and boot. tried other multiboot usb creators, but i liked this one. using since last 3-4 years and no problem whatsoever. updating easy2boot or bootable isos is also very simple. try it, you will love it. when we need to rescue a system, many of us try the winpe recovery cd first, but that doesn't work for everyone because some of the users don't have a product key. but if you don't have a product key, there is a solution. why not use a pen drive and rescue the data from the device? in this case, we can use a multiboot usb pen drive. i am sure you will know if your drivers are working properly, but if

---

you're having problems with your device, you can also use a multiboot usb. the solution is very easy: just download a demo version of your computer software on a multiboot usb and start the software. at that point, the computer will look like it's running normally. only in fact, the software is running on your usb drive, not on your computer! this way, you can try to explore and repair your computer and data with any software you like. few of us want to take the time to read all the instructions in the source to figure out what we need to do. but instead of reading them, lets just make the multiboot usb. all we need are winusb, linux live cd and a virtual machine. my ubuntu 12.04 live cd has been downloaded and the media is ready.
